COURSE 4:

CUSTOMISED AND CONTEMPORARY ORTHODONTIC TREATMENTS

AUGUST / SEPTEMBER 2017

16 CPD POINTS

Syd 12 – 13 Aug, Hilton Sydney
Melb 5 – 6 Aug, The Olsen Sth Yarra
Bris 16 – 17 Sep, The Johnson Hotel

Cost: $1500 +GST
Food/Refreshments provided

Dr. Vandana Katyal

Specialist Orthodontist

BDS (Syd), MScMed (Syd), DClinDent Ortho (Adel) MRACDS, MOrth, RCSEd
Sam Bulkley AB Orthodontics Travelling Fellowship 2013/2014 (Twice awarded)
Australian Orthodontic Board Clinical Case First Prize, 2014
Keynote Speaker and Invited Lecturer at Australian & international conferences

TIME FOR A BOSS FACT

Attendees ranked Dr. V's lecture style & scientific knowledge

"Perfect! What an informative lecture"

"A must for any Dentist or Orthodontist"

*BOSS 2016 evaluation forms

GUEST LECTURER

Dr Mark Johnstonen

BDSc(Hons) DCD (Melb)

Specialist Endodontist

Lecture Title: Endodontic-Orthodontic Interrelationships and importance of Informed Consent.

"Highly informative and a brilliant not to be missed lecture!"

SPACES ARE LIMITED!

LECTURE 1 Introduction to Digitally Planned & Customised Orthodontics

- Orthodontic Philosophies & recent shifts
- customised digital orthodontics
- evidence-basis for recent shifts

LEARNING OUTCOMES: Understanding of contemporary and new orthodontic philosophies • Awareness of different customised systems • Understand the evidence supporting customised digital orthodontics.

LECTURE 2 Biomechanics

- Sources of anchorage
- High anchorage and low anchorage treatment planning
- Anchorage in Class II and Class III cases
- Types of skeletal anchorage.

LEARNING OUTCOMES: Understanding root surface area and different type of anchorage • Retraction of anteriors • Mesialisation of molars • Apply principles of anchorage preservation to Class II and Class III treatments.

LECTURE 3 Adult Orthodontics

- Periodontal Considerations
- Psychological Considerations
- Biomechanics for adults
- Emerging role of clear aligners and social six treatments

LEARNING OUTCOMES: Be able to assess periodontal health and gingival biotypes • Understand implication of orthodontic forces with reduced periodontal support • Learn clear aligner therapy and basics for social six treatments.

LECTURE 4 Class II treatment methods

- Treatment options for Class II division I and Class II division II treatments
- Distalisation versus extraction to correct Class II malocclusion
- Types of distalisation and preservation of anchorage.

LEARNING OUTCOMES: Be able to understand the differences between Class II Division I and Division II cases • How to decide whether extraction vs non extraction to correct Class II • Distalisation and its role in correcting Class II.

LECTURE 5 Class III treatment methods

- Types Of Class III - pseudo Class III vs true mandibular prognathism
- Orthopaedic and orthodontic treatment options. Principles of treatment
- Maxillary protraction.

LEARNING OUTCOMES: Understand how to correctly diagnose a Class III malocclusion • Learn different early and later treatment options • Apply correct biomechanics principles to correct a Class III malocclusion • Understand various methods of maxillary protraction.

LECTURE 6 Risk Management

- Risk management during diagnosis
- Risk minimisation during treatment
- Evaluation of records and history and predict risks
- Evidence-based risk management strategies.Monitoring.

LEARNING OUTCOMES: Learn how to minimise risk with a thorough informed consent • Understand areas and predict risk for non compliance, root resorption, relapse, etc • Learn how to minimise litigations and understand case selection in everyday practice.
